To better inform Dialogues, and all efforts related to ending hunger, improving nutrition and health, and reducing disparities surrounding these issues in America, Local Voices are from people who are willing to share their own, organizational, or collective opinions, stories, perspectives and experiences on these topics. It is hoped that these Local Voices help inspire people to convene multistakeholder Dialogues in the future!

## 2. LOCAL VOICE FOCUS AND OUTCOMES

### MAJOR FOCUS

Addressing hunger, nutrition, and health necessitates strong federal action and support. The following recommendations are based on FLPC's research and expertise in the areas of food loss and waste, SNAP, and public nutrition programs. Where appropriate, FLPC has indicated who should be responsible for implementing the various recommendations. Each of the below recommendations is quite brief, with footnotes that link to additional FLPC and partner research showing more detail on the rationale and implementation opportunities for the recommendations. Several recommendations also include some specific call outs for opportunities for actions private sector actors can take, either with support from or outside of the work of government. While organized according to four of the five pillars set out as priorities by the White House Conference, the recommendations cover the following key areas: (1) expand food access by promoting safe, edible food redistribution through food recovery; (2) modernize and enhance SNAP's ability to reduce food insecurity; (3) increase food access infrastructure, (4) improve nutrition and health by increasing nutrition education for doctors, (5) increase and expand produce prescriptions, (5) increase support for food is medicine, (6) expand options for access to healthy food, (7) increase healthy food knowledge, (8) support healthier food options in federal spending and facilities, and (9) better coordinate and fund nutrition research and policy.
